Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Aoyama (5,838,767).

Consider claims 1 and 3, Hoffman teaches a simulated user call test system and method built in a digital stored program control switch (col. 1 lines 7-8), comprising a back process module, a front call control process module and a hardware subsystem for performing a call test (col. 1 lines 42-52), wherein: the back process module runs on a maintaining platform of the switch for providing an operation interface (i.e., workstation) for a user to perform a call test setup, receives call test result data transmitted by the front call control process module, and performs display and statistical processes (col. 1 line 53 – col. 2 line 13); the front call control process module is included in a main control module of the switch for receiving call test setup parameters provided by the back process module, controlling the hardware subsystem to perform a call test process according to a flowchart and user parameters set, and reporting a result of call test to the back process module (col. 5 lines 8-48); the hardware subsystem comprises function process units of the digital stored program control switch to receive instructions from the front call control process module, performing test comprising at least one of the following: picking-up

or hanging-up phones, detecting signaling tone, dialing, sending test tone, or talking; and reporting test results to the front call control process module (col. 3 lines 21-36).

Allowable Subject Matter

3. Claims 2, 4-6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.
